# HARDWARE FOR STEEL FURNITURE

## COMPANY PROFILE

Ebco was founded in 1963 as a Tool Room and subsequently diversified into furniture hardware and has ever since become India's leading manufacturer in the industry. Our strengths include a range of core competencies in manufacturing, an ever-widening product range, stringent quality standards, affordable prices and an all-india distribution network.

We have a state of the art design and product development department, which uses the latest 3D design software, CNC Machining Technology, roll forming and sheet metal pressing technology. Our Tool Room capacities have increased significantly which has reduced product development lead time. We have three manufacturing plants and multiple warehousing facilities north of Mumbai in the towns of Vasai and Palghar, Maharashtra. Our products are engineered to perform and our Quality Assurance Laboratory at the Vasai manufacturing plant ensures that we consistently achieve this goal. They regularly conduct rigorous cycle tests, load tests and other checks in accordance with certified international quality norms. Our manufacturing plant at Vasai houses our Design and Development department, Tool Room, Press Shop, Hardening, Phosphating and Assembly departments and has been certified in ISO 9001: 2015 – Quality Management System, ISO 14001: 2015 – Environmental Management System, ISO 45001 : 2018 – Occupational Health & Safety Management System.

## INTRODUCTION

Steel furniture requires specialized hardware that differs from those used for wooden furniture. Typically, using screws is not the preferred method for fixing hardware to steel furniture because the material often lacks sufficient thickness to securely hold the screws in place. If screws are used, they must be accompanied by nuts, which can increase both production time and costs. Therefore, hardware for steel furniture should be designed with features such as lancing or clip systems, allowing for direct clipping onto the furniture. Such designs help in rapid installation, reduce production time. Additionally, the hardware must conform to international standards, passing tests such as salt spray test, load capacity, cycle test, etc.

At ebco, we pay attention to even the smallest details to provide you with the best hardware solution for your furniture. This brochure gives an overview of our unique range of hardware designed specifically for steel furniture, along with other necessary fittings.
