## Specifications

Item	Item Code	Load Adjustment	Finish
Door Closer -Pelmet Arm	DCP-80	30kg to 80kg	SL

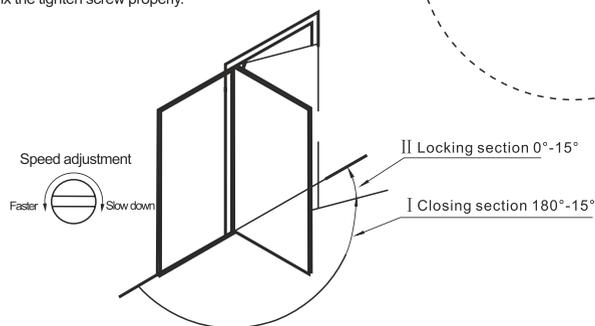

### Speed adjustment:

- 1.No.1 is for closing adjustment, No.2 is for locking adjustment.
  - 2.Counter-clockwise direction is to speed up, clockwise is to slow down.
- (As shown drawing)

### Hold-open adjustment steps:

To loosen the tighten screw on the stopper and push the stopper to the desired location. And then fix the tighten screw properly.

### Note:

1. Do not move the gear axis part before installation.
2. Do not use over power on the gear axis and arm connecting part.
3. Do not close the door with over power.
4. Check on all the screws regularly.
5. Pay more attention for speed adjustment in the season of summer and winter.
6. Do not spin the speed adjustment screw out of the door closer body.
