

## Tall Unit

- Simple-to-use slide-out storage space.
- With its integrated SOFT CLOSING mechanism for side and back-wall frames, this ingenious and high-performance space-saving solution is an invaluable asset to any modern kitchen.
- Storage space can be accessed from two sides.
- This unit includes back-facing shelves which are 470 mm deep (so far 400 mm), thereby maximising use of available storage space (additional 18%).
- Shelves and frame form an integrated whole.
- Optimal use of space, down to the very last inch.
- Complete overview of the contents with just one opening.
- The shelves can be positioned at every 5cm, making for optimal distribution.
- Magnetic Dividers can be used to organize the space on the shelves and it stops stored items from falling out of the unit.
- The non slip mat stops the unit's contents from sliding around. It can be removed easily for cleaning.

### Optimal Use Of Space

With their abundant storage space and clear, linear design, Libell shelves form an integrated whole with frames and slide-out systems. Their closed bases prevent stored items from falling out, while their rounded shape ensures that every last inch of space is put to good use. Besides, the fact that there are open corners makes them easy to clean.

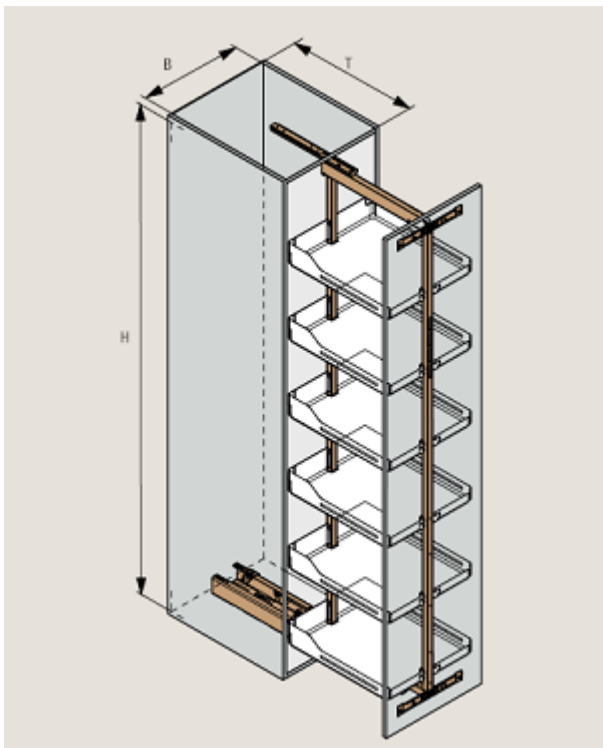

### Automatic Synchronisation

The Compact Synchro full-extension runner has a range of excellent features, including the latest roller technology, the Softstopp Plus closing mechanism and automatic synchronisation. Just before the unit shuts, the runner brings it gently to a standstill, leaving it to close silently by itself for the final few centimetres in a smooth and quiet gliding motion.

### Clickfixx Quick Assembly

Thanks to the efficient ClickFixx system, the cupboard facade can be attached to the frame without any need for tools. The unit's height, depth and rotation are adjusted via a central pivot – there's no need to loosen or tighten any screws.

B = Internal width	260/410 mm
T = Internal depth	505 mm
H = Internal height	1805-2260 mm
