Salice - Air Concealed Soft Close Hinge - Titanium

- Salice Air is an innovative and revolutionary hinge which is compact and sophisticatedly designed to deliver high functionality.
- The hinge is fully adjustable in three directions and incorporated an integrated soft close mechanism for decelerated closing or the Push self-opening system for handle-less doors.
- With a thickness of only 10mm, Air is practically invisible and can be easily concealed in the cabinet and door.
- Suitable for multiple applications such as kitchens, bathrooms, living rooms, bedroom furniture or display cabinets.
- Air is the new fusion of technology and aesthetics and marks a new era in the development of shutter opening system.
